PROLONGED MOBILE PHONE USE MAY BE LINKED TO TINNITUS

A study by researchers from the Medical University of Vienna, Austria recently published an online study that suggested regular use of a mobile (cell) phone for at least four years seems to be associated with a doubling of the risk of developing chronic tinnitus (noises in the ears).

They suggest that there is a plausible explanation for a potential link between mobile phones and tinnitus as the cochlea (inner ear) and the auditory pathway directly absorb a considerable amount of energy emitted by a cell phone.

ALL I WANT FOR CHRISTMAS IS A PAIR OF HIGH-TECH HEARING AIDS

Hearing aids have improved immensely through the years, especially within the last few years thanks to the advancement in the computer chips inside hearing aids. Dr. Freeman has demonstration hearing aids in our office to show you what these devices look like and how they work. There is no charge to come in and listen to them - just schedule an appointment time. Bring in a family member that you have difficulty hearing, so you can hear how much improvement these devices give.

FLEX SPENDING MONEY

If you have any flex spending money left in your work account, why not use it towards new hearing aids before the end of the year.

GOOD HEARING EQUALS GLAD TIDINGS

Starting with Thanksgiving and all the way to the New Year, families and friends will be getting together for joyful and noisy celebrations. If you know of someone with an untreated hearing loss, they will likely miss the laughter and conversation around them. They may feel disconnected from their families and friends and spend the holiday season feeling isolated and sad.

Living in a world of muffled sounds is not healthy for anyone's mental and emotional well-being. This has been confirmed by numerous studies. Untreated hearing loss has a negative impact on relationships and social and work-related interactions.

Both scientific and anecdotal evidence suggest that use of amplification improves all aspects of our lives.

LOYALTY MONEY

Refer your friend, neighbor, or family member to our office. Not only will you be giving them the gift of hearing, but we will also give you a gift of \$100 Loyalty Money that can be used in our office for any device or service if that person purchases a hearing aid.

RECYCLE YOUR BATTERIES

Please bring in your used hearing aid batteries.

We will be glad to recycle them for you.
